

Individual Options Height Adjust

We can make any piece of furniture height adjustable: Lecterns, Desks, Tables or Credenzas

Our height adjust system is best for 3 reasons:

1. Reliability: Never a product failure in 25 years. Absolutely no maintenance.
2. Performance: 750 or 1200 lb capacity; 5-1/2", 8" or 11" range, operation is quiet, stable, smooth and fast. Unbalanced loads lift perfectly straight.
3. Space efficiency: Our system leaves room for equipment. The lifts take up only 3" on each end and are hidden.

MLM-HDM4 4 Piston Lift.....\$3400
MLM-HDM6 6 Piston Lift.....\$3650

This curved desk has room for rack or CPUs in both bays despite an 8" lift capability.

This compact 32 inch wide lectern has a standard rack and is on casters.

This 47 inch wide lectern has an 8 inch lift, casters and 2 open shelf bays for storage or equipment.

Furniture Bases

Full to the floor

A full-to-the-floor base is standard on most lecterns and is never an extra charge.

Full-to-the-floor Base No Charge

Recessed

A recessed base is available on most lectern styles that don't have it as standard. A recessed base helps protect the lectern from damage from vacuum cleaners. When ordered as an option there is an extra charge.

Recessed Base as option..... \$350

Rotating

A rotating base allows any lectern style to turn 180°. This base is used by courts, city counsels and law schools to allow a quick change of audience. The design allows the lectern to turn without damaging wiring. A simple release mechanism controls the movement. The turning mechanism is completely hidden. Also see the Rotating Top on page 15.

Rotating Base \$1950
