

# Rear Access Panels, Fixed Rack Rail & Rack Boxes

## Rear Access Panel, External Locks

Locking panel is removed to service racks and other equipment. For security, locks may be keyed differently than the cabinet.

M-RAP Locking Rear Access Panel.....\$520

## Hidden Lock Access Panel

The panel lock is controlled by a cable release inside the cabinet. No locks are visible to the audience.

M-HRAP Rear Access Panel, Hidden Lock.....\$820

## Fixed Rack Rail

Fixed equipment rack can be installed in any opening. Rear rails, if needed, are included. Intake and exhaust vents are provided. Access to the rear of the rack is usually by the rear access panel option shown to the left.

M-RM Fixed Rack Rail, front & rear, per bay.....\$200

All rack boxes come with rear rails. This box is centered in a small lectern over the floor vent.

## Matching Rack Boxes

If you need rack in any cabinet, lectern or credenza and you don't want a visible access panel, use a matching rack box. They are available in custom sizes up to 20 rack units. Rear rails, if needed, are included. Boxes are notched to allow venting and are finished to match the lectern. Slide the rack out or turn it to access equipment.

Std Wood / Laminate

M-RB13 Rack Box up to 13RU.....\$320 / \$650

M-RB20 Rack Box up to 20RU .....\$450 / \$900

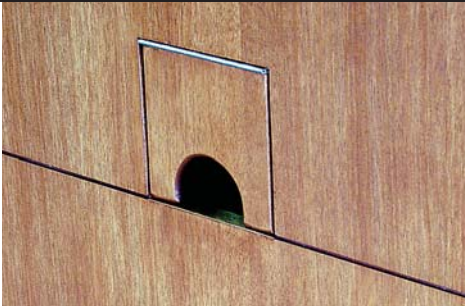

Size: 20 5/8" W x 18" D

See stand-alone rack boxes on pages 21 & 36.

This matching rack box is set to one side to allow for a tower CPU. Box is centered over vent.

## Cable Doors

We have two designs to allow cables to exit a cabinet side. A hinged flap with a "mousehole" and a hinged flap with a brush. The mousehole works best with cable bundles and the brush with individual cables.

M-CPD-M Cable Door with Mousehole.....\$140

M-CPD-B Cable Door with Brush .....\$150

## Cooling Fans

If fans are needed to add extra ventilation to a cabinet, we recommend putting the fan inside the cabinet blowing in, which forces air out the top vents. Inside placement also reduces fan noise. We can put external fans wherever you want them.

M-FAN-IN Internal Fan, wired .....\$180

M-FAN-EX External Fan with grill .....\$260

## External Electrical Feed

Bring power to your lectern using any round-headed extension cord. The recessed male socket is wired in a box and wired to a 6-outlet surge protector.

EEF Recessed Male Socket, Wired .....\$200

## Padded Covers

Our covers are custom made for each lectern shape. Rip-stop nylon inner and outer covers and a thick fiber padding layer protect your lectern from bumps and scrapes. An optional zipper is available. Price varies with size, but most are around \$700. Available in Black, Grey and Navy Blue. Silkscreen logos are available, also.

## Surge Protectors

We offer two APC brand surge protectors. The smaller one has 6 outlets and is included with any order for clocks, lights or cable reservoirs. It is available separately, also. The larger unit has 11 outlets, telephone line protection and a built in cord wrap.

APC-6 6-outlet surge protector.....\$40

APC-11 11-outlet surge protector.....\$50
