

Stationary Rack Cabinets

Stationary rack cabinets allow an equipment rack to be part of the furnishings in a room. The single-wide vertical style solves space problems in rooms where a credenza style rack cabinet won't work. (See pages 37-38 for credenzas.) Shelves can be mixed with or substituted for rack. Cabinets are shown in Prairie and Radius Styles, but can be made to look however you wish. All MEQ cabinets have rear access panels and ventilation standard. Front and rear rack is standard. Available on levelers or on appliance casters.

MEQ-50R shown in Light Red Walnut finish. Front and rear rack, rear access and venting is standard. MFI #89661™

MEQ-63P shown in Natural Cherry. Front and rear rack, rear access and venting is standard. MFI #12161™

Radius Style Stationary Rack Cabinet
