The ELCO™-ADA36: A Compact, Economical ADA Solution

Marshall Furniture's new ELCO™-ADA36 provides essential ADA accommodations for wheelchair accessibility in an easy-to-specify, cost-effective unit.

Ensuring a space adheres to ADA guidelines is an ever present concern among clientele. In response, customers are continuously searching for furniture solutions that will meet the guidelines set forth by the Americans with Disabilities Act. We have been sensitive to this issue for some time and offer many custom options to fit these needs; however, we know that cost is of the essence. In response, we designed our new ELCO™-ADA36 lectern.

A basic overview of ADA requirements dictates that furniture should have sit-to-stand capability coupled with equal access to controls and a properly-sized knee space for wheelchair users. Our ELCO™-ADA36 fulfills all three needs while maintaining a compact size to ensure its universal use in almost all spaces. This unit includes height adjust, our electronically-controlled ADA pullout work surface, locking service panel, presenter locking doors, internal adjustable height shelf, cable passage, ventilation and casters.

A set of popular options can be added to individualize your design including fixed rack, fans, surface cut outs, lighting and a custom logo, to name a few. The ELCO™-ADA36 can be specified in any of our regular or textured melamine colors, ships fully assembled in 30 days and comes with a 10-year warranty. See our ELCO™-ADA36 in action in the below video.
