Heavy Duty Drop Leaf

MSHD-24 Heavy Duty Drop Leaf
We offer a superior, stainless drop leaf mechanism. The release is very positive and it locks in the down position. Weight limit is 60 lbs.

Rear Access Panel, External Locks

M-RAP Locking Rear Access Panel
A locking panel is used to service racks and other equipment. For security, locks may be keyed differently than the cabinet.

Hidden Lock Access Panel

M-HRAP Hidden Lock Rear Access Panel
The panel lock is controlled by a cable release inside the cabinet. No locks are visible to the audience.

Hidden Drop Leaf

MSHD-24F Hidden Drop Leaf
Our heavy duty telescoping mechanism is built into the side of the cabinet. When closed it is almost invisible because the grain is a perfect match with the cabinet side.

Full Front Removable Access Panel

FF-RAP Full Front Removable Access Panel
The panel lock is controlled by a cable release inside the cabinet. No locks are visible to the audience. A seam is visible from the sides of the lectern.

Flush Hidden Drop Leaf

MSHD-24-FS Flush Hidden Drop Leaf
The hidden flush drop leaf is almost invisible when closed because the grain is a perfect match with the cabinet side. When open, the top is flush with the work surface. Must be ordered with the Flush Side option. See page 13.

Rear Hinged Doors

M-RHD Rear Hinged Doors
The rear of the lectern features locking hinged doors. This adds convenience and style to the access panel function.

Fixed Rack Rail

M-RM Fixed Rack Rail, front & rear, per bay
Fixed equipment rack can be installed in any opening. Rear rails are included. Ventilation is provided. Access to the rear of the rack is usually via a rear access panel.

Rack Boxes to Match Furniture

If you need rack in any cabinet, lectern, or credenza and you don't want a visible access panel, use a matching rack box. They are available in sizes up to 20 rack units. Rear rails are included. Boxes are notched to allow venting and are finished to match the furniture. Slide the rack out or turn it to access equipment.

M-RB13 Rack Box up to 13RU
M-RB20 Rack Box up to 20RU
The box on the right is offset to make room for a computer. The box on the left is centered in a small lectern over the floor vent.
