

# Custom Credenzas with Rack or Shelving

Credenzas are a great storage solution and are available in a variety of sizes, styles, and finishes. Rack credenzas come standard with surface grommets, standard locking doors, fixed rack rail, locking rear access panel, floor hole for cable pass, ventilation as needed, and non-swivel carpet casters or levelers. Credenzas with shelving, on the other hand, are designed for utility use and do not include a locking rear access panel or rack rail. All models can be spaced around third party specified racks as well. They are available in any of our 23 stock wood veneer finishes, laminate, or can be custom color or wood matched to room architecture.
